

Contents

Monika Chuchro, Anna Franczyk, Maciej Dwornik, Andrzej Leśniak A Big Data processing strategy for hybrid interpretation of flood embankment multisensor data	269
Adam Cygal, Michał Stefaniuk, Anna Kret, Monika Kurowska The application of electrical resistivity tomography (ERT), induced polarization (IP) and electromagnetic conductivity (EMC) methods for the evaluation of technical condition of flood embankment corpus	279
Michał Górecki, Maciej Ziulkiewicz The presence of geogenically saline waters in the area of salt dome Rogóźno (central Poland)	289
Joseph R. Harrington, Jimmy Murphy, Mary Coleman, Declan Jordan, Tristan Debuigne, Gabor Szacsuri Economic modelling of the management of dredged marine sediments	311
Elżbieta Myśkow, Dariusz Krzyszkowski, Lucyna Wachecka-Kotkowska, Dariusz Wieczorek Plant macrofossils from the Czyżów Complex deposits of the Szczerków outcrop, central Poland	325
Nguyen Dinh Chau, Mariusz Kopeć, Jakub Nowak Factors controlling ^{226}Ra , ^{228}Ra and their activity ratio in groundwater – an application in Polish Carpathian mineral waters	337
Bartłomiej Szczepan Olek, Henryk Woźniak Determination of quasi-filtration phase of consolidation based on experimental and theoretical course of the uniaxial deformation and distribution of pore pressure	353
Urszula Wiącek, Urszula Woźnicka Feasibility of Monte Carlo modelling for the neutron-neutron logging tool response in specific geological models	365
INSTRUCTIONS FOR THE AUTHORS	385
